

avoid toxic tank syndrome during COVID-19 lock down

We are here to help you maintain your aquatic systems during these challenging time. CASCO**Pure** is an innovative bacterial water treatment that has been specifically cultivated to improve water quality and ultimately the health of your fish, as well as reducing cleaning and maintenance time.

CHALLENGE

Fewer resources mean its harder to keep on top of maintenance

⚠️ RESULTING ISSUE

Decline in water quality
Health issues for livestock

SOLUTION

Regular use of CASCO**Pure** reduces maintenance and has been cultivated to improve the health of your fish

CHALLENGE

Difficulties in replenishing fish stock due to lock down restrictions

⚠️ RESULTING ISSUE

Beneficial bacteria within your filtration system dies off

SOLUTION

CASCO**Pure** keeps the bacteria density by providing live beneficial bacteria and enzymes that rapidly mature and cycle new and existing systems to deliver crystal clear, perfectly balanced water

CHALLENGE

When the time comes to restock fish, boom! Huge ammonia spike

⚠️ RESULTING ISSUE

Resulting in Toxic Tank Syndrome and fish die!

SOLUTION

Add CASCO**Pure** when restocking. Each ball covers toxic ammonia and nitrite into safer forms, significantly reducing fish loss through poor water quality and Toxic Tank Syndrome

CASCOPure

CASCO**Pure** has been specifically designed to meet the needs of commercial aquatic systems. Available for both freshwater and marine systems.

Simply drop 1 ball per 450 ltrs (120 US liquid gallons) per month.

HOW IT WORKS

KEY BENEFITS

- ✓ Up to 50% reduction in fish mortality
- ✓ Rapidly matures new filters and aquariums
- ✓ Digests waste and clears water
- ✓ Reduces detritus and maintenance
- ✓ Repairs damaged biological filters
- ✓ Eliminates Toxic Tank Syndrome
- ✓ Reduces overall maintenance and labor
- ✓ 2 Year shelf life

1. When the level of toxins and waste is greater in the water than in the CASCO**Pure**, the bacteria leave the sphere.

2. Remaining bacteria stays within the ball and continues to eat the bacteria food source, the CASCO**Pure** ball will function for weeks.

3. The bacteria then digests toxins, primarily dangerous ammonia and nitrites, keeping your water clean and your fish healthy.
